CAREER OBJECTIVE

BCA graduate with hands-on experience from a MERN Stack internship, skilled in building responsive user interfaces, creating REST APIs, and managing MongoDB databases. I am seeking a Web Developer / MERN Stack Developer position where I can apply my academic knowledge and practical internship experience to real-world projects, learn new technologies, and contribute to the growth of the organization.

SKILLS

Frontend	Backend	Database	Tools
o HTML	o Node.js	o MongoDB	o Git
o CSS	o Express.js		o GitHub
o JavaScript			o Postman
o React.js			

EDUCATION

Bachelor of Computer Applications (BCA)   Gandhinagar, Gujarat

Navgujarat BCA College, Gujarat University   July 2022 – May 2025

CGPA: 6.45/ 10

- **Specialization:** Computer Applications with a focus on programming, web development, database management, and system fundamentals.

INTERNSHIP

Full Stack Developer Intern (MERN Stack)   Ahmedabad, Gujarat

BrainyBeam Technologies Pvt. Ltd.   July 2024 – May 2025

- Contributed to the development of full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Built and optimized interactive, mobile-friendly UI components to improve overall user experience.
- Developed and integrated RESTful APIs for handling authentication, user data, and application workflows.
- Designed and managed MongoDB schemas with Mongoose, ensuring efficient data flow and performance.
- Performed API and feature testing using Postman to identify issues and ensure smooth integration.
- Supported the team in debugging, code reviews, and implementing best development practices

PROJECT

Share Life, Give Blood – Blood Donation System (MERN Stack)

Technologies: React.js, Node.js, Express.js, MongoDB

- **Description:** Developed a full-featured blood donation platform with separate Admin and User modules. Implemented authentication (login, register, forgot password), donation scheduling, blood request management, and user dashboards. Integrated scroll-based animations, real-time donation updates, and notification features.
- **Key Features:**
  - User authentication with JWT
  - Admin dashboard for managing donors, requests, and blood stock
  - Donor eligibility notifications
  - Responsive UI with React
  - MongoDB database with multiple collections (users, donations, requests, feedback)
